

AGENCY & WEB STUDIO LICENSE

Add a private invoice & quote tool to every client site.

InvoiceHarbor is a single-file web app that runs entirely in the browser. Your clients create quotes and invoices, convert a quote to an invoice, and print or save a PDF — without an account, a subscription, or a server. Their document data stays on their own device.

Demo: <https://myproj-20250827-f32e05.web.app/app.html?demo=1>

What you can offer clients

- Quotes and invoices with reusable clients, tax, discounts and notes
- Offline-first: works from a single file on a laptop or phone
- Their logo, accent color, Classic/Modern/Minimal styles
- A4 or US Letter print + browser save-as-PDF
- JSON backup and restore they control
- No cloud account and no invoice data uploaded

Agency license

\$149

one-time

Deploy InvoiceHarbor for unlimited client projects.

- Editable single-file source + documentation
- Use your client's branding and domain
- No backend or subscription to maintain
- 3 months support for installation and defects
- You keep the client relationship and service revenue.

1. Get the source

Pay by Wise or bank transfer; receive the ZIP, docs and agency license by email.

2. Brand it

Add the client's logo, colors and business details in Settings. No build step.

3. Deploy anywhere

Upload one HTML file to their site or any static host. No database.

License summary: unlimited client deployments for one agency/legal entity; no resale, redistribution or sublicensing of the source; not a multi-tenant SaaS. InvoiceHarbor is a document tool, not accounting, tax or legal software; you and your clients are responsible for invoice compliance and tax rates.
